***Response to Arguments***

Applicant's arguments filed October 15, 2007 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Shpak (US 2003/0207699) and Zeira (US 2005/0047354).

***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-3 and 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shpak (US 2003/0207699) and Zeira (US 2005/0047354).

1. Regarding claims 1-2 and 5-6, Shpak discloses a method for use by a wireless device in a wireless communications environment (fig. 1). The method comprises associating the wireless device with a current access point (fig. 1), where access points transmit at less than full power (para. 46, last ten lines). The mobile station sends a request for association with a target access point (para. 42, last four lines).
2. However, Shpak does not disclose ascertaining whether the wireless device should attempt to associate with an alternative access point. Zeira discloses a handoff procedure based at least in part on the automatic collection of attenuation of signal strength of transmissions (para. 22-23; note: path loss) which represents the maximum potential signal strength (para. 14 and 20; note: interference). Therefore, it would have been obvious to one skilled in the art at the time the invention was made to determine handover based on path loss in the invention of Shpak because one skilled in the art would recognize the predictable result that a higher quality

communication link is gained when a handover procedure is based in part on path loss (Zeira, para. 22-23; fig. 4, steps 66-70; see KSR Int'l Co. v. Teleflex Inc., 2007).

3. Further regarding claim 3, the combination of Shpak in view of Zeira provides for a path loss (Zeira, para. which is related to the biased distance from an access point which accounts for AP loading (interference).

### ***Allowable Subject Matter***

Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
